Who we are

Founded in Switzerland in 1996, CREATEQ partners with organizations on their most demanding software challenges — from highly regulated financial and energy systems to modern cloud platforms. We work as embedded teams, integrating directly with our clients' engineering organizations rather than operating at arm's length.

- ISO 9001 & ISO 27001 Certified

Our Services

Custom Software Development

End-to-end design, engineering, and delivery of bespoke software systems tailored to complex, mission-critical requirements.

Software Modernization

Evolving legacy platforms into future-ready systems, supported by our in-house AI-assisted engineering framework.

How we work: Embedded Teams

Our engineers integrate directly into client organizations — sharing tools, rituals, and accountability — to deliver with the speed of an internal team and the precision of a specialist partner.
